

Introduction

The challenge you are trying to do requires a VPN tunnel into the Hacking-Lab environment. Connecting via VPN allows us to work around some very common problems, such as network address translation on your network.

Safety notice

Only connect with to the Hacking-Lab Student VPN using well-secured systems! Do not expose any service to the VPN you do not intend to. We recommend using a VM for this challenge.

VPN instructions

You can connect to our challenges directly via an OpenVPN connection. You will find the up-to-date information on how to do this online under the following URL:

<https://github.com/Hacking-Lab/hl-livecd/blob/master/openvpn/OpenVPN.md>
